Relevant Experience

Dancing House Consulting Ltd I'm currently providing freelance consultancy and development services to a small selection of long term UK clients.

- Freelance Developer**
2008 – Present
- Working mainly with the latest Microsoft Web Stack, but also supporting projects over 12 years old for some long standing clients.
 - Providing "full stack" development services.
 - Managing small teams of trusted local freelancers on larger projects.

University of Nottingham /EMIS *QResearch is a large consolidated database derived from the anonymised health records of over 9 million patients. EMIS develops the clinical systems used in 60% of the UK's surgeries.*

- Lead Web Developer/ Architect**
2006-2008
- Designed, developed and delivered several web applications based around reporting massive amounts of health data.
 - Developed winforms modules in the EMIS clinical healthcare application used by over 3000 UK surgeries.

Fern Training & Development *Fern provided training and personal development courses. They were the biggest private sector provider of the Government's New Deal training programme in the country.*

- Information Systems Architect**
2004-2006
- Responsible for designing & developing online MI (Management Information) systems.
 - Developed and deployed several other Line of Business applications to support the MI system.

-
- Ramesys, Notts.**
- Senior Web Developer**
2002-2004
- Designed and developed modules and core functionality for the company's web based content management software.
 - We used classic ASP and SQL server, and migrated the product to C# .NET in 2003.

-
- VeriSign UK**
- Lead Developer**
1999-2002
- Developed resilient, high traffic 3-tier web applications (1.5 million unique visitors to all storefronts per month average)
 - Designed and implemented high security login areas that allowed customers to directly configure their products.

-
- Notts Rural Community Council**
- Web Developer**
1996-1999
- Developed bespoke ASP & Access database applications.
 - Supported users of the developed applications with training and mentoring.
 - Deployed internet and video conferencing infrastructure to rural sites.
